Aesthetically pleasing
A fence frames your garden and gives scale to your landscape design

Privacy and Security
Fences give privacy to make your yard feel like your own space. They also give children a place to play with boundaries.

Design
A fence can become an integrated part of the overall design of your home.

all about

building a batten fence

What do I need for a 1.8m high fence?

100x100mm H4 Posts

1 @ 2.4m long every 2.4m, plus one for the end.

75x25mm H3 or Vitex Battens

About 19m for every metre of fencing, plus 10% waste.

100x50mm H3 or Vitex 'studs' and top and bottom rail

6 @ 1.8m for the studs every 2.4m bay, if you use 400mm centres. The more studs you put in, the less waste you will have, as the studs allow you to join the battens.

2 @ 2.4m for the rails.

20kg Rapidset Concrete

About two bags per post hole. The posts should be 600mm into the ground.

Nails

Galvanised 60mm ringshank nails for H3 battens, or stainless screws for Vitex. 90mm galvanised jolt head for fixing rails to posts.
